## COMPLETE CONTROL AND FLEXIBILITY

- Conduct multiple inventories concurrently at various sites and reconcile data at one central location
- Supports both types of inventories—*Baseline* to add new assets, and *Dynamic* to verify any data on existing assets
- Track assets at remote locations, where inventories can be conducted by exchanging data via email attachments
- "Import/Export Helper" allows you to import data from, or export data to, the most popular spreadsheets and database applications
- Windows Mobile® and Palm OS® devices make it easy to perform inventories with in expensive barcode readers
- On-screen Virtual Reader lets you perform a test inventory—and even add assets—before you invest in hardware

SEAMLESS INTEGRATION

FAS 100 Asset Inventory integrates seamlessly with FAS 100 Asset Accounting, allowing physical inventory data to be easily reconciled with existing asset data

TOP-NOTCH SUPPORT IS JUST A CALL OR CLICK AWAY

Sage FAS SupportPlus members benefit from an unmatched level of customer support. You can use Sage FAS SupportPlus Online to get answers 24 hours a day, 7 days a week. Or call our friendly experts for help. What's more, Sage FAS SupportPlus users can also download software upgrades, access multimedia tutorials, and take advantage of exclusive discounts on new products.

FAS 100 Asset Inventory combines solid fixed asset inventory capabilities with an easy-to-use interface and readily integrates with the complete line of Sage FAS solutions.

Efficiently create and track multiple physical inventories of assets and enjoy complete control over your entire asset inventory at every step with FAS 100 Asset Inventory. This solution allows you to thoroughly track your fixed asset inventory, eliminating lost or stolen assets and reducing insurance and tax overpayments. With automated inventory functionality and built-in reconciliation capabilities, FAS 100 Asset Inventory offers you a complete range of inventory tracking tools so you can effectively achieve tighter control over your fixed assets.

With an easy-to-use wizard that walks you through every step of reconciling your inventory, FAS 100 Asset Inventory makes automating your fixed asset inventory tracking simple. Using state-of-the-art bar code technology, including Windows Mobile®, Palm OS®, and Symbol® devices, FAS 100 Asset Inventory lets you perform inventories with less expensive bar code readers containing more memory. You can conduct multiple inventories concurrently at various sites and reconcile data at one central location. And, since FAS 100 Asset Inventory comes with over 50 fully customizable fields, you can control data entry with notes and images to describe each asset record. Better still, FAS 100 Asset Inventory integrates seamlessly with FAS 100 Asset Accounting, allowing physical inventory data to be easily reconciled with existing asset data.

From developing innovative products to providing award-winning customer support, Sage Software is dedicated to surpassing expectations in all aspects of our business. Sage customer service representatives are standing by to provide you with top-notch products and service.

FAS 100 Asset Inventory

"Sage FAS paid for itself in the first year of use, and we estimate that using the software has reduced the time spent on asset tracking and recording by about a third. Plus, because Sage FAS is so dependable, we don't have to spend our time on the phone with support."

Jill Kight, Cost Analyst
Catawba Valley Medical Center

Simplified Fixed Asset Inventories

- Easy-to-use wizard-based application design walks you through every step of conducting and reconciling your inventory
- Simple hardware setup involves minimal data input with just a few clicks of the mouse
