

SalesLogix System Requirements and Compatibility Checklist

Hardware and software requirements for SalesLogix v5.2, v6.0, v6.1 and v6.2

The hardware requirements for SalesLogix are to be used as a guideline only. Hardware requirements depend on the number of users, activity, size of database, number of records, Operating System, and RDBMS.

The software requirements show all qualified and supported software for use with SalesLogix.

Recommendations are in **BOLD**

SalesLogix Windows Client Requirements				
Hardware	v5.2	v6.0	v6.1	v6.2
Minimum memory required / Recommended memory (in MB)	64 / 192+	96 / 192+	96 / 192+	96 / 256+
Minimum processor required / Recommended processor (in MHz)	300 / 800+	300 / 800+	300 / 800+	300 / 800+
Free disk space for application files (in MB)	100+	150+	150+	150+
Remote Client requires 56K modem for synchronization; DSL, Broadband, or network connection recommended	✓	✓	✓	✓
Remote Client requires minimum additional 250+ MB free disk space for database and sync files <i>(depends on subscription rules and account ownership which increase size of database)</i>	✓	✓	✓	✓
Operating System	v5.2	v6.0	v6.1	v6.2
Microsoft Windows XP Professional SP2			SP2	✓
Microsoft Windows XP Professional SP1	SP5	✓	✓	✓
Microsoft Windows 2000 Professional (SP3 Recommended)	✓	✓	✓	✓
Microsoft Windows NT 4.0 Professional (SP6 Required)	✓	✓	✓	
Microsoft Windows 98SE	✓			
Microsoft Windows ME, Microsoft Windows XP Home <i>Not qualified as these are intended for home, not corporate use.</i>				
MDAC 2.6 (included)	✓	✓	✓	
MDAC 2.8			SP2	✓
Citrix MetaFrame 1.8			✓	✓
Citrix MetaFrame XP			✓	✓
Citrix Presentation Server Feature Release 4				SP3
Local Database (for Remote Client only)	v5.2	v6.0	v6.1	v6.2

MSDE 2000 (SP3 or greater, SP3 included)	✓	✓	✓	✓
Microsoft SQL Server 2000 Personal Edition <i>SP3 or greater required</i>	✓	✓	✓	✓
Microsoft SQL Server 2000 <i>SP3 or greater required</i>	✓	✓	✓	✓
Microsoft SQL Server 7.0 <i>SP3 or greater required</i>	✓	✓	✓	✓
Microsoft SQL Express				SP3
Interbase 5.6	✓			
Word Processor (for Mail Merge features)	v5.2	v6.0	v6.1	v6.2
Microsoft Word 2003			SP2	✓
Microsoft Word XP	SP5	✓	✓	✓
Microsoft Word 2000 (SR1-a or greater)	✓	✓	✓	✓
Microsoft Word 97 (not recommended)	✓			
SalesLogix Word Processor	✓			
Email	v5.2	v6.0	v6.1	v6.2
Microsoft Outlook 2003 <i>Workgroup or Corporate mode, not Internet-only mode Word is not recommended as e-mail editor with Outlook</i>			SP2	✓
Microsoft Outlook XP <i>Workgroup or Corporate mode, not Internet-only mode</i>	SP5	✓	✓	✓
Microsoft Outlook 2000 <i>(SR-1a or higher required) Workgroup or Corporate mode, not Internet-only mode Word is not recommended as e-mail editor with Outlook</i>	✓	✓	✓	✓
Microsoft Outlook 98 (Not recommended)	✓			
Microsoft Outlook 97 (Not recommended)	✓			
SalesLogix Mail Client (included) <i>SalesLogix Mail Client supports Internet mail, Lotus Notes R5 in "Office Mode", and GroupWise 5.5 and 6.0</i>	✓	✓	✓	✓
Reporting	v5.2	v6.0	v6.1	v6.2
Crystal Reports Professional	8.0	8.5	8.5	8.5
SalesLogix Report Writer	✓			
IQ Report Writer <i>(Only supported for qualified customers on v5.2)</i>	✓			
Fax	v5.2	v6.0	v6.1	v6.2
Microsoft Fax Service				✓
WinFax 8.02, 8.03, 9.0, and 9.0.2 with local modem	✓			
WinFax Server 5.0	✓			
Browser	v5.2	v6.0	v6.1	v6.2
Microsoft Internet Explorer 6.0	SP5	✓	✓	✓
Microsoft Internet Explorer 5.5	✓	✓	✓	✓

Microsoft Internet Explorer 5.01	✓			
Sync to Personal Information Managers using Intellisync for SalesLogix (Included)	v5.2	v6.0	v6.1	v6.2
Microsoft Outlook 2000 <i>(SR-1a or higher required)</i>	✓	✓	✓	✓
Microsoft Outlook XP	SP5	✓	✓	✓
Microsoft Outlook 2003 <i>(SR-1a or higher required)</i>			SP2	✓
Lotus Notes R5 in "Office Mode"	✓	✓	✓	✓
Lotus Notes 4.6 in "Office Mode"	✓	✓	✓	✓
Novell GroupWise 5.5 <i>(Export from SalesLogix to GroupWise Only)</i>	✓	✓	✓	✓
Sync to Handheld Devices	v5.2	v6.0	v6.1	v6.2
Once you have synchronized from SalesLogix to any of the PIMs above, you can now sync to any device supported by those PIMs including Palm OS, RIM Blackberry, Pocket PC, and other compatible devices. For example, you can synchronize between SalesLogix and Outlook and between Outlook and Palm (SLX <-> Outlook <-> Palm). Contact your PIM or device manufacturer for the appropriate sync software. Using Intellisync for SalesLogix and the retail version of Puma Intellisync (not included), you may synchronize directly to the following devices: <ul style="list-style-type: none"> • Palm Powered Handheld Synchronization • Pocket PC Synchronization 	✓	✓	✓	✓

SalesLogix Wireless Requirements							
Qualified Web Phones and Service Providers	v5.2	v6.0	v6.1	v6.2			
SalesLogix for Web Phones includes HDML and WML templates for US and international customers. The templates have been qualified with the Openwave browser and platform. Openwave-compatible phones are listed at: http://upmkt.openwave.com/dev_phones/phones.cfm Openwave-compatible carriers are listed at: http://upmkt.openwave.com/dev_carriers/carriers.cfm NOTE: Additional carriers and phones may be compatible and may be qualified in the future.	✓	✓	✓	✓			
SalesLogix Qualified Regional Settings and Languages							
<i>Language Packs are downloadable from SupportOnline or available from regional Business Partners. Specific version requirements are included in the Language Packs.</i>							
Language Translation	Regional Settings						
	English (U.S.)	English (U.K.)	English (Australia)	French (France)	German (Germany)	Spanish (Spain)	Italian (Italy)
English	✓	✓	✓	✓	✓	✓	✓
French				v5.2, v6.1.1a+			
German					v5.2,		

					v6.1.1a+		
Spanish						v5.2, v6.1.1a+	
Italian							v5.2, v6.1.1a+
About Qualified Environments							
Please note that this list offers general guidelines about qualified environments. A "qualified" environment is one in which SalesLogix has been tested. When new releases to operating systems (OS), database management systems (DBMS), and etc. are made available, the product team makes every attempt to certify new SalesLogix releases with new operating system service packs, etc. However, in order to keep the checklist readable, we can not list every single service pack for every OS or DBMS. Instead, a general phrase such as "Operating System 'x' Service Pack 'x' or higher is supported" is used.
